富高H.T PASTE能提供最抗磨損，抗溫及抗流動的問題，其獨特之陶瓷粉在高温使用確係在1400°C以下不碳化及污染，能有效提供抗高温及在注塑時不流出的技術。達到F.D.A標準使用安全。

FUKKOL H.T Paste is a paste special formulated by anti-wear additives recommended use in "Mould Parts". It's contains NANO ceramic powder which can "stands"1400°C temperature and would not "melt" under extreme condition. We warranty that it would not "fill-out" and carbonize inside the mould. This products was certificated and approved by FDA.

Stop Mould Parts Burn Problem

保護 Warranty ③

FUKKOL H.T PASTE 不含毒性物質，不含鐵金屬，沒有石墨、二硫化鉬和硫化物的添加劑；同時得到國家級口毒性測試及SGS ROHS認證。

FUKKOL H.T Paste are NON-TOXIC, FREE of "heavy metal" contains such as graphite, molybdenum, disulphide etc. It is approved by China government, FDA, International SGS and ROHS.

壽命 ↑ 25%
Extended "Tools & Parts" Life Span 25%!!!

用途 Application ①

All Mould Parts
所有模具配件

①. Ejector Pins 頂針

②. Sleeves 司筒

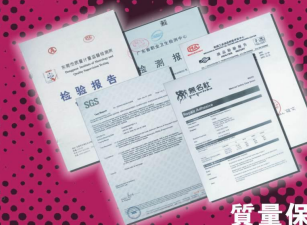

③. Mould Internal Parts
模具內部配件

優點 Benefits ②

不流出: 在模具注塑時確保產品不會因油脂溶解污染產品
No Outflow During Plastic Injection Process it would not "contaminant" the plastic parts.

不溶解: 獨特的陶瓷粉確保油脂能抗 1400°C 高温
No Melting It has high heat resistibility until 1400°C.

不碳化: 納粒及陶瓷粉填充在金屬表面，確保油脂不會在 1400°C 內碳化
No Carbonization Nano ceramic powder has resistibility to "Carbonizing" even at 1400°C temperature.
