# TECHNICAL DATA SHEET

## ISO 3 METAL DRAWING OIL

### Description:

FUKKOL ISO 3 is a moderately viscous high efficiency lubricant specially designed for deep drawing of metal, especially for most metals such as stainless steel or iron and non-ferrous metals.

FUKKOL ISO 3 contains metal high pressure additives to reduce pressure during stretching and deep drawing, thereby reducing damage and improving production efficiency.

### Purpose :

FUKKOL ISO 3 can be coated, injected, or sprayed. This product can reduce the loss of mineral oil in difficult operation. It will not affect the color of metal surface, and its compatibility is also stable.

### Performance characteristics :

- It can withstand high load operation, reduce metal damage and burst.
- Suitable for carbides metal processing
- Can be used as pure oil
- Can be used in automatic lathe system

Products Code	Packings	Capacity
I100199-4L	Can	4L
I100199-18L	Pail	18L
I100199-200L	Durm	200L

### Typical Physical Properties:

Appearance:	Viscous brown liquid
Odour :	Mild
Density :	0.84~0.89g/cm
Flash Point :	>220°C
Viscosity :	288-352(mm /s, 40°C )

Matters needing attention:

1. Pay attention to sealing and preserving oil products
