TECHNICAL DATA SHEET

AL5105 WATCH SPRING BAR REMOVABLE SOLVENT

Description:

High AL5105 is a special kind of environment-friendly extreme pressure lubricant, the unique extreme pressure agent can provide a kind of lubrication in the surface of the surface, without any residue, and it is meeting the requirements of the clock factory. The high AL5105 is not only transparent, but also has good lubricity, which can improve the production efficiency. If the concentration is high, trichloroethylene can also be used to dilute it.

Purpose:

It can load and unload the watch ears, and there is no residue left on the metal parts.

Products Code	Packings	Capacity
I100318-4L	Can	4L
I100318-18L	Pail	18L
I100318-200L	Durm	200L

Performance characteristics:

- Complete volatilization, no residue.
- High transparency and easy to observe.
- Good lubrication.

Typical physical properties:

AL 5105	Relative density g/cm ³	40°C Kinematic viscosity mm ² /s	Pour point °C	Flash point °C	Appearance
-	0.95~0.98	2-5	-	-	Colorless Transparent Liquid

Matters needing attention :

- 1, Keep it sealed and store in a cool place (not in contact with sunlight).
