## BLUE LUBE ONOMETER WATCH OIL

### Description:

FUKKOL BLUE LUBE ONOMETER WATCH OIL It is a kind of special lubricating solvent for synthetic oil extreme pressure agent. The unique extreme pressure agent can provide a kind of lubrication in the watch hole, which is meeting the requirements of the clock factory.

Products Code	Packings	Capacity
I100312-4L	Can	4L
I100312-18L	Pail	18L
I100312-200L	Durm	200L

### Purpose:

For general gear or quartz watch gear trains, there is no residue on the lubrication metal parts.

### Performance characteristics:

- To reduce friction resistance and wear, improve energy transfer efficiency, maintain the original accuracy of the clock, and extend the service life.
- Good lubrication.
- long term use, no deterioration, no dispersion, low freezing point.

### Typical physical properties :

Blue advanced synthetic precision watch oil	Relative density g/cm <sup>3</sup>	40°C Kinematic viscosity mm <sup>2</sup> /s	Pour point °C	Flash point °C	Appearance
-	0.840~0.890	36-44	<-30	>240	Blue transparent liquid

### Matters needing attention :

- 1, Keep it sealed and store in a cool place (not in contact with sunlight).
