TECHNICAL DATA SHEET

High purity textile machine white oil

Brief introduction:

High purity and high purity knitted white oil is a newly developed lubricant for low viscosity knitting machines. It is suitable for the lubrication of all kinds of cylinder knitwear by using advanced imported formula and imported additives and blending imported high-quality base oil. The knitted white oil with high purity and high purity is easy to be removed by conventional dyeing and finishing, and is especially suitable for the processing of primary grey cloth.

Products Code	Packings	Capacity
I120104-4L	Can	4L
I120104-18L	Pail	18L
I120104-200L	Drum	200L

Typical Physical Properties:

High purity textile machine white oil	DENSITY g/cm ³	FLASH POINT °C	POUR POINT °C	VISCOSITY 40°C	VISCOSITY INDEX
—	0.82~0.85	>150	<-9	19.8~24.2	—

Matters needing attention:

1. Pay attention to sealing and preserving oil products
