Low temperature bearing grease

Description:

Fukkol low temperature grease is a general aviation grease made from stearic acid thickener, synthetic oil, and structural improver and antioxidant.

Purpose:

It is suitable for 5000r/min~20000r/min grinder spindle, 2000r/min continuous spinning and twisting spindle bearing, 3600r/min air spinning separation spindle bearing and mechanical and mechanical bearing, instrument and instrument motor bearing, high speed household micro motor and low temperature liquid pump motor.

Products Code	Packings	Capacity
I100296-4L	Can	4L
I100296-18L	Pail	18L
I100296-200L	Durm	200L

Performance characteristics :

- Can be used in the temperature of -600C~1200C
- Can withstand heavy load.

Typical physical properties:

Low temperature Bearing Grease	NLGI	Coning	Drop point °C	Appearance
—	2	64~74	>150	Light brown semid

Matters needing attention:

1. Please use it in a suitable temperature range, so as not to cause the grease to freeze or melt.
2. Sealed storage.
