TECHNICAL DATA SHEET

SHINTO 772 STAINLESS STEEL CUTTING OIL

Brief introduction:

FUKKOL SHINTO 772 It is a high-quality oil-based cutting oil with specially developed additives and lubrication additives.

use to:

Suitable for general to most difficult cutting operations. Can be used for metals such as stainless steel and tensile steel. Suitable for various processes such as cutting, tower teeth, drilling, punching, shearing, stretching, etc.

Advantages:

- Rapid heat dissipation helps to reduce the temperature of cutting tools and workpieces, prolong tool life, and improve surface brightness.
- Excellent extrusion performance, reducing heat generation during processing and reducing tool wear.
- Ensure rapid removal of metal machining chips and reduce losses.

Typical physical properties

Density	Flash Point	Pour Point °C	Viscosity 40°C	Appearance
0.82~0.85	≥200	≤-5	28~34	Dark brown transparent liquid

Matters needing attention:

1. Pay attention to sealing and preserving oil products
