产品描述及数据参数

SYN-Fully II

Description:

High SYN-Fully II is a fully synthetic formulation suitable for different types of metal cutting and grinding processes. Because of its total synthetic formula, the life of the processing fluid is much longer than that of emulsified oil, which is more than 2 times higher than that of semisynthesis.

Purpose:

It is suitable for all kinds of metal processing operations, such as punching, cutting, drilling, turning, grinding, sawing, etc.

Performance characteristics :

The cutting effect is good.

It contains antirust additives.

High dilution multiple.

Products Code	Packings	Capacity
I100114-4L	Can	4L
I100114-18L	Pail	18L
I100114-200L	Durm	200L

Typical Physical Properties:

Appearance	Brown and yellow liquid
Smell	No special smell
5% water solution pH value	8.0~10.0
Concentration	1.0~3.0
Dilution ratio	1: 20
Copper corrosion	1a

Matters needing attention:

1. Pay attention to sealing and preserving oil products
2. The dilution water products should be added to the water
3. Regular maintenance
