# TECHNICAL DATA SHEET

## ALUCUT X ALUMINIUM AND COPPER CUTTING OIL

**Description:**

Transparent, light yellow oil cut, contains special stains, extreme pressure additives, preservatives, antioxidants and anti atomizing additives.

Products Code	Packings	Capacity
I100120-4L	Can	4L
I100120-18L	Pail	18L
I100120-200L	Durm	200L

**Purpose :**

A variety of mechanical processing that is easy to medium difficulty. It is especially suitable for processing machinery of copper, copper alloy, aluminum, aluminum alloy and most steel products. Modern machine tools, such as NC, CNC machining center, etc. Due to mutual leakage, it is possible to cause cutting oil, machine tool lubricants and hydraulic transmission fluid mixing system. General machining.

**Performance characteristics :**

- for all kinds of "high technology" machine tools
- improve surface finish
- reducing maintenance costs
- three use of one oil to ensure fault free operation

**Typical Physical Properties:**

APPEARANCE	VISCOSITY 40 <sup>o</sup> C mm <sup>2</sup> /s	FLASH POINT <sup>o</sup> C	POUR POINT, <sup>o</sup> C	DENSITY 25 <sup>o</sup> C , g/cm <sup>3</sup>
Light Yellow Clear Liquid	4.5~5.5	≥120	≤-5	0.82~0.85
