TECHNICAL DATA SHEET

YC-2700 WIRE CUTTING FLUID

Description:

This product has a long period of use and is not easy to deteriorate. It has a certain dielectric strength and arc reduction effect. It can ensure the stability of wire cutting current and voltage, and it is not easy to break the line. Thus, the finish and cutting efficiency of the workpiece can be

improved.

Purpose:

This product is applicable to various machine processing technology, various diluting water and large scale of various machine tools. Processing workshops, all kinds of ordinary alloys, including some non-ferrous metals, grinding and high concentration.

The processing fluid can be used for the first processing of difficult to machine metals.

Products Code	Packings	Capacity
I100116-4L	Can	4L
I100116-18L	Pail	18L
I100116-200L	Durm	200L

Performance characteristics:

- reducing inventory
- improving mechanical processing performance
- increasing productivity under harsh conditions
- prolonging the life span.

Typical Physical Properties:

Appearance	Ambe
Density (at 20℃)	0.878
PH@5% Dilution	8.5~9.5
Corrosion, %(200mg/Lwater), IP287	1a

Matters needing attention:

1. Pay attention to sealing and preserving oil products
2. The dilution water products should be added to the water
3. Regular maintenance
