# TECHNICAL DATA SHEET

## FUKKOL VITEX QUENCHING OIL

### Description:

Fvda is a refined quenching oil with high flash point. It provides an effective forgery program. It has high heat resistance. The antioxidant and acidification inhibitors not only prolong its working life, but will not change or increase the viscosity and acidity of the quenching oil, and prolong the life of the metal products after

the quenching program is completed.

### Purpose

Heat treatment of mould and parts.

### Performance characteristics

Good cooling function.

The flash point is high, so it is safe to use.

The hardened performance is good.

Excellent heat stability and stability.

Products Code	Packings	Capacity
I100050-4L	Can	4L
I100050-18L	Pail	18L
I100050-200L	Durm	200L

### Typical Physical Properties

Density at 20°C 20°C	0.83~0.89
Viscosity at 40°C	28.8~35.2
Flash point, °C	≥220
Pour point, 0°C	≤-6

Matters needing attention:

1. Pay attention to sealing and preserving oil products
