产品描述及数据参数

ANTI-SEIZE COPPER COMPOUND

Description:

It is suitable for the lubrication of mechanical parts that are easy to be corroded or oxidized and often difficult to assemble and disassemble. Suitable for any equipment or parts that are easy to corrode, such as the mechanical brake connecting parts of the sea and vehicles, especially the engine exhaust manifold nut (often

bitten to death for high temperature).

Products Code	Packings	Capacity
I100081-4L	Can	4L
I100081-18L	Pail	18L
I100081-200L	Durm	200L

Purpose:

- A screwdriver that is prone to bite.

Performance characteristics:

- Excellent water resistance, easy to remove threaded parts in humid environment.
- It can be used to prevent the nut from falling off when the exhaust manifold nut and other high temperature applications are applied.
- Temperature tolerance range -40 C-1100 C.

Matters needing attention

1. Please use it in a suitable temperature range, so as not to cause the grease to freeze or melt.
2. Sealed storage.
