TECHNICAL DATA SHEET

RUSTKING S TYPE

Brief introduction:

High efficiency omnipotent antirust lubricants can be used to clean all kinds of metal devices, which can easily remove the mud and hard material in the mechanical friction pairs, such as: in the gun barrel after shooting, it can be sprayed or soaked after multi effect omnipotent antirust lubricants and then used for cleaning. When the spark plug contact of the vehicle is defective, it can be sprayed with multi effect and all-purpose antirust lubricant without the need of erasing. It is very easy to start. Multi effect and all-purpose antirust lubricants can also be used to remove the tar and sticky adhesive stuck to the car table easily. The dried sugar on the carpet. Multi purpose omnipotent antirust lubricants antirust lubricants multi-purpose maintenance agents, with rust, dehumidification, rust, lubrication, cleaning, conductance of the six functions, and play a role. The multi effect and omnipotent antirust lubricants can effectively maintain all kinds of mechanical equipment, precision instruments, parts and components, and can keep the metal products in good working condition for a long time and prolong the service life. The legendary multi effect and omnipotent antirust lubricants attract worldwide attention. The multi effect and omnipotent antirust lubricants have excellent antirust effect on metal, have a strong affinity with the metal surface, and have strong permeability, and can effectively eliminate the moisture and moisture of the metal surface and inside. Proud of it is that all kinds of all-purpose antirust lubricants are non lubricated and can effectively lubricate metal parts. At the same time, multi effect and all-purpose antirust lubricants can efficiently remove grease, dirt, stains, labels and other adhesion substances on many objects.

Purpose:

1. multi effect omnipotent antirust lubricants can not stick to all kinds of precision metal devices, such as clocks, turret rollers, motor converter bearings, automatic weapons, drive chains, throttle control valves, connecting rod cable, motor drive grooves, motor shaft, pump shaft, rotary compass, control dashboard, air pressure and automatic control instrument. Doors and windows slide parts, door locks, door hinges, etc. Especially electronic plug-in, after the treatment of the multi effect and omnipotent antirust lubricant, the product lubrication period is greatly improved, the product competitiveness is increased, and the service life of the carbon brush is increased.
2. multi effect omnipotent antirust lubricants are suitable for long effect rust prevention of cast iron, cast steel and powder metallurgy parts. It is especially suitable for rust prevention of ship and metal parts. It is also suitable for electronic precision instruments, radar and gear, automatic weapons, turret roller, control panel, precision fittings, hardware tools and mechanical accessories. Mother machine, electrical contact point, bomb projection system, alloy jet turbine will be used for iron and steel parts, and can prevent high sensitive components from corrosion and oxidation.

TECHNICAL DATA SHEET

Advantage:

-Cleaning: the multi effect and omnipotent antirust lubricants have strong permeability and metal surface affinity, and can completely remove the adhesion on the surface of metal, such as oil stains, dirt, dust and so on. Although multi effect and all-purpose antirust lubricants are highly permeable, there is no damage to metal surface paint, fiber, plastic nylon, etc.

-Lubrication: the multi effect and omnipotent antirust lubricants can be evenly distributed on the surface of the metal parts, permeated into the close metal friction pair, and eliminate the noise between the metal joints and maintain a flexible rotation. Proudly, multi effect all-purpose antirust lubricants are non sticky and can be attached to metal surfaces for long lubrication.

-Antirust: the multi effect and omnipotent antirust lubricants have a strong affinity to the surface of the metal, and the permeability is very strong (stronger than water), it can penetrate into the inner of the fine metal hole, and remove the moisture and moisture and form a thin and compact protection film to isolate the moisture and air, so as to achieve the effect of long-term antirust.

-Conductance: a multi effect and omnipotent antirust lubricant itself is a high insulator, but it can eliminate the membrane or parathion caused by oxidation on the electrical contact point, which makes the current smooth and the voltage stable.

Typical physical properties

Product	RUSTKING S TYPE
Appearance	Brown transparent liquid
Density 25°C, g/cm ³	0.78
Copper corrosion 100°C 3h	1a
Antirust time	1-2 years (indoors)
Water solubility	Insoluble in water
Propellant	LPG

Warning and precautions:

Warning: avoid continuous release of gas, preferably in a ventilated environment, to avoid skin stomach and eye touch, such as skin stomach touch thoroughly clean with water. If your eyes touch, lift your skin immediately and wash your eyes for 15 minutes, and seek medical advice as soon as possible.

Storage / attention: do not break or burn the gas tank. Do not let the gas tank heat, close to the spark or open fire, or stored in the temperature 49 C environment, please store this product in the luggage compartment or the rear para tire placed inside, not in the carriage. Change this product every two years
