TECHNICAL DATA SHEET

INTERCHECK DEVELOPER

Description:

Rich high detection liquid is an effective coating of a white fine particle which can be suspended fast drying solvent. It can provide an excellent imaging effect for penetrant.

Application:

This product can be widely used in chemical, shipbuilding, power generation, aviation, machinery, automobile, metallurgy, petroleum, railway, pressure vessel and other departments.

Usage method:

1. clean the dirt on the surface of the workpiece (float rust, grease, etc.) with the cleaning agent and clean the permeation channel.
2. use the penetrant to spray the treated surface evenly, and then penetrate for 5-15 minutes.
3. clean the surface of the workpiece with a cleaning agent.
4. shake the developer thoroughly and keep the workpiece at a distance of 150mm 300mm.
5. after spraying the imaging agent, the defect can be observed for a moment.
6. after the examination, remove the developer with scrubbing agent.

Typical Physical Properties:

APPEARANCE	ODOR	FLASH POINT °C	BOILING POINT°C	VOLATLLE	DENSITY 25 °C , g/cm ³
white	Solvent taste	<-10	60	Rapid	0.704
