# TECHNICAL DATA SHEET

## DAC 2Rust remover

### Description:

High rust remover is a special kind of acid solution formula, a special cationic permeation agent and a solid inhibitor more than other cleaning agents, and it can provide effective protection on many kinds of metals and planes. The way of use includes soaking, wiping, or spraying.

Products Code	Packings	Capacity
I100078-4L	Can	4L
I100078-18L	Pail	18L
I100078-200L	Durm	200L

### Purpose:

It is especially applicable to metal surfaces, houses, panels, aluminum and tin boilers, industrial models, bright aluminum and stainless steel before finishing the paint, and can also be used to clean radioactive pollution pollution instruments, tiles and port grouting equipment.

### Performance characteristics:

Fast wetting and penetrating ability make the rust removal and erosion speed faster than the commonly used acidic liquids. It can exert its effectiveness at any temperature, and even when a large amount of rust and scale is destroyed, its power still exists, and it will not precipitate.

### Typical physical properties

Rust remover DAC2	Relative densityg/cm <sup>3</sup>	PH VALUE	Appearance
—	0.958	<2	Light red liquid

### Matters needing attention:

1. Do not contact with food.
2. Sealed and preserved.
3. Wear protective equipment, such as gloves, when used.
