TECHNICAL DATA SHEET

SUPER GLUE REMOVER

Description:

The high instant dry gel scavenger is a kind of mixed solvent, which is used to remove the cured cyanoacrylate adhesive on the surface or on the fabric. It can also be used to remove the adhesive components from the base material, so that the cured cyanoacrylate adhesive can be reused.

Products Code	Packings	Capacity
I100516-4L	Can	4L
I100516-18L	Pail	18L
I100516-200L	Durm	200L

Purpose:

Used for metal, plastic, silica gel, rubber and plastic material surface and oil pollution, cleaning instant gel, fast drying glue material residual colloid. It is mainly to remove the instant glue for curing. Secondly, it can erase the whitening traces of the glue.

Usage method:

First surface treatment clean, apply a proper amount of glue on the solidified glue water, need to cover completely, depending on the size and thickness of the length of time, to be softened, with appropriate tools to remove. If applied: thickness is thick, can be repeated many times. The adhesive is not easy to damage most of the plastic or paint, but in order to use it safely, please use the small area first.

Typical physical properties:

SUPER GLUE REMOVER	Relative density g/cm ³	Smell	Appearance
—	1.05	Mild smell	Colorless Transparent Liquid

Matters needing attention :

1. Do not contact with food.
2. Sealed and preserved
