WAX REMOVER

Description:

Wax removal water cleaning agent is made from degreasing strong surface active agent, effective agent and so on. Besides, wax removal is quick, thorough and durable. No injury to the base.

Usage method:

Ultrasonic cleaning steps: when the solution is prepared, the water should be added to the clean water. When heated to 60 C, the required proportion of wax water is added to the side stirring edge, and it is fully stirred and promoted to the required temperature.

Products Code	Packings	Capacity
I120353-4L	Can	4L
I120353-18L	Pail	18L
I120353-200L	Durm	200L

Performance characteristics:

- Permeable cleaners can remove bottom cleaning.
- Containing corrosion inhibitors to reduce the rust of the workpiece.

Typical physical properties:

Wax remover	Relative density g/cm3	PH VALUE	Appearance
—	0.96	9.0-10.0	Colorless Transparent Liquid

Matters needing attention :

1. The human body is not in direct contact with the product.
